

Homerton Radiology Update- January 2021

Referral Guidance

- Please only send urgent patients for X-Ray-especially if they belong to a vulnerable group
- Please consider local pathways before referring for USS and MRI
- For MSK imaging-patients should be referred to locomotor in the first instance-they can request imaging and are based in the community-reducing the COVID risk
- DEXA has been temporarily suspended-patients already referred will have their appointments rebooked
- Imaging for suspected cancer continues as normal-please provide full clinical details to help with vetting
- Duty radiology available on bleep 341 before 5pm on weekdays
- Out of Hours input available via HUH Switchboard- if urgent

Missing Results

Some practices have been reporting issues with radiology results coming through- we're collating examples to identify the pattern. Please raise any issues you have been having with James Courtney at the CCG- james.courtney1@nhs.net and send examples to huh-tr.radiology.quality@nhs.net. Staff at the CCG can't handle patient identifiable information.

To chase missing results, please email: huh-tr.Radsecretaries@nhs.net
