Which topic in the afternoon Women's Health session was the most useful?

How satisfied were you with the session?

Do you have any other comments, questions, or any other feedback you would like to make us aware of?

- Very long section on cervical smears- relevant facts could have been done in half an hour. The quiz doesn't bear much relation to the teaching session. Vulval abnormality talk was excellent
- The vulval abnormalities session was really really good, the contraception update was also good, the cervical screening session was patronising and did not concentrate on what we needed to know.
- Great event. Tough quiz!
- All of the lectures were excellent and pitched at completely the right level for gpps/practice nurses. The vulval lecture was a new topic, but very relevant for clinicians taking smears to be able to properly examine the vulval
- Its not clear in the assessment questions that you are referring to the same example in question 2 for the next 3 questions.
- Contraception update and vulval abnormalities very useful and relevant. Felt the cervical screening could have been shorted and allowed another session e.g. HRT.
