

EMIS Web resources for seasonal Influenza 2021/22

Last updated 02.09.2021

This article explains the search resources available in EMIS Web for the 2021/22 Seasonal Influenza vaccination programme.

There are 2 published rulesets for seasonal influenza – PRIMIS Uptake rulesets and CQRS payment rulesets. Neither of these are designed for recall, but we understand that you need recall tools to help you plan your flu campaign. We've made the decision to produce our protocol and recall searches based on the PRIMIS uptake ruleset as these are well respected and are clinically reviewed annually, unlike the CQRS ruleset which is created solely for payment purposes.

Within each section below, there will be folders/items designed specifically for Northern Ireland customers.

Searches

Call/recall searches

The call/recall searches for 2021/22 are available in the following EMIS Library Population Reporting folders: **SNOMED Searches > Cytology and Immunisation > Seasonal Vaccinations > Influenza Vaccinations RECALL 2021/22 > Call/Recall Searches:**

EMIS Library		Name	Population
<ul style="list-style-type: none"> ▲ EMIS Library <ul style="list-style-type: none"> ▲ Cytology and Immunisation <ul style="list-style-type: none"> Additional Cytology ▶ Childhood immunisation diary recall ▶ Hepatitis B vaccination for at risk children ▶ Hexavalent/Pentavalent patient management searches Men B coverage Men C 12 week (3 month) diary entry present MSM (Men Who Have Sex With Men) HPV ▶ Pertussis ▶ PHE Baseline Sentinel Searches ▶ Pneumococcal ▶ Rotavirus ▲ Seasonal Vaccinations <ul style="list-style-type: none"> ▲ Influenza Vaccinations RECALL 2021/22 <ul style="list-style-type: none"> Call/Recall Searches Supplementary Searches ▶ Previous Years ▶ Shingles (Herpes zoster) ▶ Target Audits (2yr and 5yr olds) 		<ul style="list-style-type: none"> 🔍 All Patients eligible 2021/22 <ul style="list-style-type: none"> 🔍 All Patients at risk who have not refused Vaccination 2021/22 <ul style="list-style-type: none"> 🔍 All Patients at risk who have not yet had Influenza Vac 2021/22 <ul style="list-style-type: none"> 🔍 Children aged 2, and 3 who have not yet had Influenza Vac 2... 🔍 Patients aged 18 to under 65 at risk no flu Vac 2021/22 🔍 Patients over 65 at risk who have not yet had Influenza Vac ... 🔍 Patients under 16 at risk who have not yet had Influenza Vac... 🔍 Patients under 65 at risk (exc Reception - Y11) no flu Vac 21... 🔍 Patients under 65 at risk who have not yet had Influenza Vac... 🔍 Reception - Y11 children who have not yet had Influenza Vac... 	

Where we deem it clinically necessary we make amendments to the searches meaning they don't fully match the PRIMIS ruleset. If you'd like further information about these changes please ask on the EMIS Now Community forums.

The purpose of the recall searches is to highlight patients who may be eligible for vaccination, however it still requires clinical judgement in individual cases as to whether to proceed with immunisation.

Supplementary Searches

The supplementary searches are available in the following EMIS Library Population Reporting folders: **SNOMED Searches > Cytology and Immunisation > Seasonal Vaccinations > Influenza Vaccinations RECALL 2021/22 > Supplementary Searches:**

The screenshot displays the EMIS Library interface. On the left, a tree view shows the following structure:

- EMIS Library
 - Cytology and Immunisation
 - Additional Cytology
 - Childhood immunisation diary recall
 - Hepatitis B vaccination for at risk children
 - Hexavalent/Pentavalent patient management searches
 - Men B coverage
 - Men C 12 week (3 month) diary entry present
 - MSM (Men Who Have Sex With Men) HPV
 - Pertussis
 - PHE Baseline Sentinel Searches
 - Pneumococcal
 - Rotavirus
 - Seasonal Vaccinations
 - Influenza Vaccinations RECALL 2021/22
 - Call/Recall Searches
 - Supplementary Searches**
 - Previous Years
 - Shingles (Herpes zoster)
 - Target Audits (2yr and 5yr olds)

On the right, a list of search names is displayed under the heading 'Name':

- All patients aged 50 y to under 65 y (2021/22)
- All 50 y to under 65 y vaccinated (2021/22)
- Currently homeless person (2021/22)
- Currently homeless person vaccinated (2021/22)
- HHC of immune deficient person (2021/22)
- HHC of immune deficient person vaccinated (2021/22)

Enhanced Service searches

Enhanced Services (Patient Management) searches for 2021/22 will be released soon.

You'll find Enhanced Services (Patient Management) searches within the following Population Reporting folders: **SNOMED Searches > Enhanced Services (Patient Management) > Enhanced Services 2020/21 > Seasonal Influenza 2020/21**.

These searches are created for the Seasonal Influenza Enhanced Service and *not* the Childhood Influenza Enhanced Service.

Patient Management searches help with the call/recall of patients and are *not* an indication of achievement. Your achievement for the seasonal influenza enhanced service will be extracted via GPES. You'll be able to view the extracted figures in [Viewing data extracted to CQRS in Enquiry Manager](#).

Uptake searches

Uptake searches for 2021/22 will be released soon.

Your seasonal influenza uptake figures are uploaded to ImmForm automatically. However, if you wanted to compare or keep a check on your figures throughout your campaign, you can do so using our library reports.

These uptake searches are available in the following EMIS Library Population Reporting folders: **SNOMED Searches > Cytology and Immunisation > Seasonal Vaccinations > Previous Years > Influenza Vaccinations UPTAKE 2020/21**. Here you'll find folders split into at-risk groups, each containing searches displaying patients at risk and patients vaccinated.

Protocols

You'll find the 2021/22 protocol for the influenza vaccination in Templates & Protocols: **EMIS Library > EMIS Protocols > Influenza/Pneumococcal Protocols.**

The protocol is based on the PRIMIS specification, This means patients who receive an alert are clinically eligible for the vaccination but may not attract payment. Clinical judgement should be used to decide which patients you vaccinate.

Templates

You'll find the template in Templates & Protocols: **EMIS Library > Primary Care Templates > Immunisations.**

The alert within the influenza protocol links to a Library Item, when you double click the alert the library item that contains the relevant information/codes will launch.

The Immunisations template can also be used to record the vaccination, for children the Childhood Immunisation template can be used. You can run both templates on a patient record by clicking **Add > Data using template**.
