

Installing MobilePASS+ app to enable soft VPN on your smart phone

For security reason it is recommended that you install the MobilePASS+ app for generating VPN authentication codes on your work or personal mobile rather than the NHS laptop you have been provided. The steps below outline how to enrol the VPN token to the app on your phone.

1. On your mobile phone go to the App store
 - Apple Store for iPhone/IOS
 - Play Store for Android/Google
2. Search for SafeNet MobilePASS+ (Careful, there are two versions of this App, you need the version with + in the title), install and then open the app.

3. Now login to your NHS Mail account **on your smart phone**, find the SafeNet activation email and click on the link.

Test One:

Your self-enrollment account has been created.

If you are enrolling a hardware token, and do not have your token yet, please contact your system administrator.

Please, go to the following URL to enroll with the Authentication Service:

<https://se.safenet-inc.com/selfEnrollment/index.aspx?code=ol3ehyKsxGZ8kP3MhTBQfDH5L>

If the above link does not work, please copy and paste this url to your web browser.

4. Initially you will be asked to scan a QR code but there is an option to enrol without a QR code further down the page. Click on this option.
5. You will then be presented with the screen below. Click on *Enroll your MobilePASS+ token*.

Enrolling your token on this device:

If the MobilePASS+ application is not yet installed on your device:

Download and install it

Once the application has been installed, select the link below to install the token on your device.

[Enroll your MobilePASS+ token](#)

In the event you are experiencing difficulties with loading the token with this link, you may copy the following string, open the MobilePASS+ application, select Automatic Enrollment, and then paste (on some platforms it may already be pasted):

```
RW5yb2xsbWVudFVSTD1odHRwczovL3NlLnNhZmVuZXQt  
aW5jLmNvbS9zZWxmZW5yb2xsbWVudC9kc2twcC5hc3B4  
P3NjPUIzbFB1aUliVjMNCIVzZXJJRD10ZXN0Lm9uZQ0KUG  
Fzc3BocmFzZT0yMDY4
```

To enroll your token on another device

Please select a supported device below, and follow the instructions.

6. After a couple of introductory screens you will be asked to create a four digit pin and then re-enter the same pin to authenticate. Once this is done you have successfully enrolled the VPN token and will be able to generate 6-digit authentication codes.

Further details on how to use your VPN username and 6-digit code to connect the VPN using the Cisco AnyConnect Secure Mobility client on your laptop can be found [here](#).
