

Laptops						
Model & procurement source	Software	Integrated equipment	Secure connectivity	On receipt at the practice	Support	Purpose/use
Dell 5300 via <u>NELSTP</u> (Black)	<ul style="list-style-type: none"> • Windows 10 • EMIS Web • MS Office 2010 • Cisco AnyConnect client (for VPN) • AccuRx • Anti-virus • Bitlocker encryption • Smart card drivers 	<ul style="list-style-type: none"> • Webcam • Microphone (Smart card reader not integrated, wherever possible an external reader will be included in box)	Redcentric soft VPN token (to be requested on receipt of laptop, instructions on acceptable use policy (AUP). Requires download of MobilePASS+ app)	<ul style="list-style-type: none"> • Read the AUP • Request a soft VPN token (instructions in the AUP) • Everything else should be ready to go! 	Through the Egton Helpdesk that you normally use. We would recommend obtaining a login for EMIS Now (https://www.emisnow.com/csm) for logging issues online.	For use by all practice staff but provision of a smart card reader means devices may be more suitable for clinical use (for EPS)
Dell 5300 via <u>Egton</u> (Black) – Have a large sticker on that says 'EMIS Anywhere'	<ul style="list-style-type: none"> • Windows 10 • EMIS Web • MS Office 2016 • Cisco AnyConnect client (for VPN) • AccuRx • Anti-virus • Bitlocker encryption • Smart card drivers 	<ul style="list-style-type: none"> • Webcam • Microphone • Smart card reader 	Egton soft VPN token (instructions for activation linked in AUP). Devices also come with Mi-Fi device for mobile connectivity.	<ul style="list-style-type: none"> • Read the AUP • Set up Egton soft VPN token • Everything else should be ready to go! 	Through the Egton Helpdesk that you normally use. We would recommend obtaining a login for EMIS Now (https://www.emisnow.com/csm) for logging issues online.	For use by all practice staff but integrated smart card reader means devices may be more suitable for clinical use (for EPS)

Dell Inspiron 3585 via GPC (Silver)	<ul style="list-style-type: none"> • Windows 10 • EMIS Web • MS Office 2013 • Cisco AnyConnect client (for VPN) • Anti-virus • Bitlocker encryption • Smart card drivers 	<ul style="list-style-type: none"> • Webcam • Microphone 	Redcentric soft VPN token (to be requested on receipt of laptop. Requires download of MobilePASS+ app)	<ul style="list-style-type: none"> • Request a soft VPN token • Everything else should be ready to go! 	Not currently supported but CCG/GPC can help resolve issues that arise.	For use by practice non-clinical staff to supplement laptop demand management issues

Accessories/peripherals				
Accessory	Model/supplier	Function	Dependencies	Support
Smartcard reader	HID Omnikey 3121	Allows user to login using a smart card for accessing spine services such as EPS and eRS	Any device that these are used with will require smart card drivers; they are no use without this and should only be requested if the user is in possession of laptops provided by the CCG/GPC or has installed the necessary software on a personal device (not straight forward)	N/A. Support may be required for drivers (see laptop support above).
Hard VPN token	Egton/SafeNet	To provide secure internet connection (N3/HSCN) while remote working, these are physical tokens	Only provided by the CCG when accompanying an Anywhere Consult laptop purchased from Egton (this has been the case with laptops previously provided by the CCG). Can be purchased directly from Egton.	Through the Egton Helpdesk that you normally use. We would recommend obtaining a login for EMIS Now (https://www.emisnow.com/csm) for logging issues online.

Soft VPN token	Redcentric/SafeNet (can also come from Egton but these have only been procured with Egton laptops listed above)	Provide secure internet connection (N3/HSCN) while remote working, these are applications you install and run on NHS or personal devices that do not already have a hard token/fob (non- physical/dongles)	Requires user to download free MobilePASS+ app to their personal mobile phone. This app, once enrolled/linked to VPN, generates the 6-digit code to authenticate the VPN connection.	Contact CCG in first instance.
Mi-Fi/mobile data hotspots	Vodafone	Picks up mobile data network and boosts signal for access by multiple devices.	Is intended for use in practices that have WiFi signal coverage issues. Limited number available.	N/A
