

Pressure Ulcers: A factsheet for you and the people you care for

Did you know that **anyone** can get a pressure ulcer (or a bed sore)?

.....and they can happen any time and very quickly.....

If skin is red/ purple, blistered, Painful or open → Speak to the GP or nurse as soon as you can

You can get them on your body at these places where your body is most bony or even on your nose or your ears where the skin is thin.

Or you might find your skin **feels different** or looks **darker**.

To prevent this you can

Keeping moving!

Walk, move, exercise - little but often. Keep standing, Keep dancing! ☺

Sitting for a long time? Don't forget to **change your position from time to time**. Maybe you need to speak to your GP or nurse about getting a **special cushion or mattress**.

If you are having problems / accidents with your bladder and/or bowel, speak to your GP or nurse. Urine and stools can irritate your skin and cause soreness.

Don't be embarrassed to speak about it!

Keep your skin clean and dry.
Use transparent skin creams.
Ask your GP or nurse for advice.

Enjoy your food!

Drink plenty of water and make sure you have a healthy and balanced diet! Don't forget vegetables and fruits.

A healthy diet means healthy skin

Would you like some more information?

You can download the free app for smart phones and ipads: just search 'PU Info'
